9. Statement of Project Goals and Objectives:

Improve access to approximately one (1) mile of good spawning and rearing habitat for salmonids and other fish species.

10. Project Description: (Provide concise description of project and attach map.)

This project would replace the existing 80 foot long, 4' 8" diameter pipe with an open bottom arch structure. BLM engineers could complete the design work through an MOU with the Coquille Watershed Association. The stream drains about 1600 acres and has approximately one mile of stream under 3% gradient. The culvert is a fish passage barrier due to being undersized and both the inlet and outlet are blocked.
